

# 大型气动彩虹机

LARGE PNEUMATIC RAINBOW MACHINE

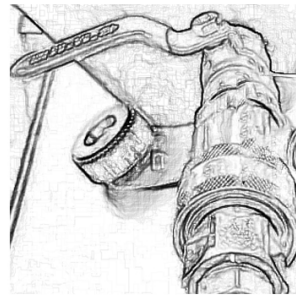

# 机器操作步骤

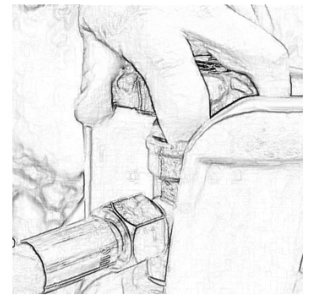

- 1: Open the flight case and take out the contents in turn. (Trachea, colored paper tube, screws)
- 2: The two sides of the storage box are fixed with screws (angle adjustment);
- 3: The colored paper tube is also screwed to the storage box;
- 4: The air pipe is connected to the machine and must be clamped (check the machine valve must be closed);
- 5: The gas pipe is connected to the gas cylinder and must be tightened with a wrench;
- 6: Put the scraps of colored paper into the colored carton (not too tight, fluffy is best);
- 7: Twist the cylinder and open the valve on the machine to spray out colored paper instantly;

Tighten the gas pipe and cylinder with a wrench

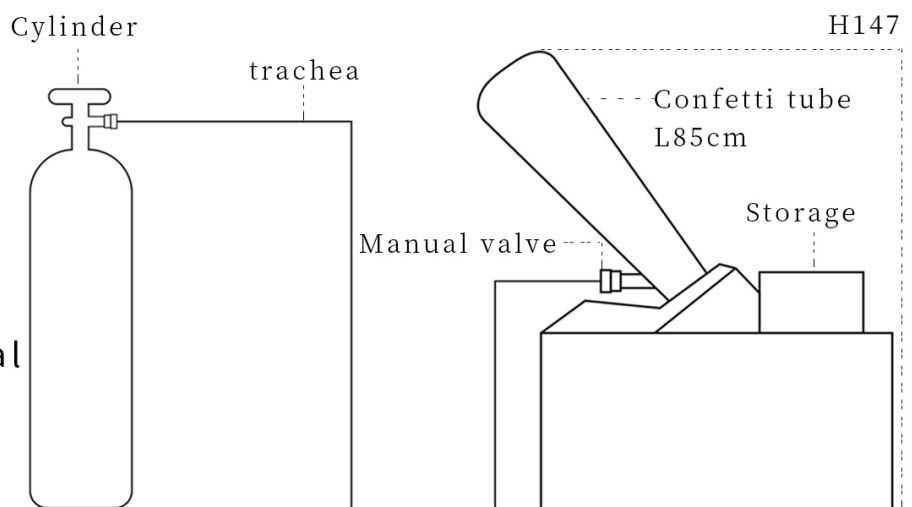

Check that the machine valve is closed

Open the cylinder valve

## PARAMETER

Gas: Nitrogen/co2  
 Air pipe: 3 m  
 Control mode: manual  
 Capacity: 3L  
 Covered area: 60 m<sup>2</sup>  
 Jet distance: 10-15 meters

|                          |                  |           |
|--------------------------|------------------|-----------|
| Net weight (large): 45kg | Size: 100*48*147 | Box H87cm |
| Net weight (small): 21kg | Size: 61*28*74   | Box H44cm |

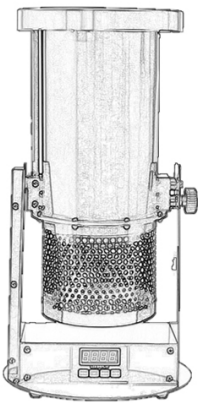

# INTRODUCTION

There are two types of large pneumatic rainbow machine, large and small.

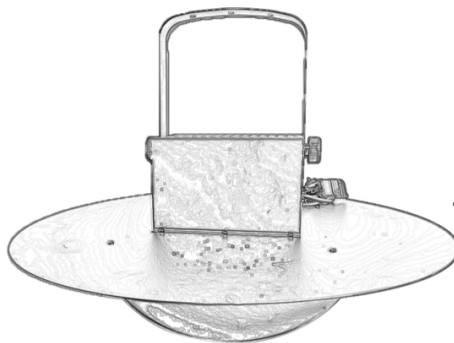

The machine is equipped with air box packaging, which makes the machine easy to disassemble and assemble, beautiful, and it is powered by nitrogen or carbon dioxide gas.

A whirlwind is created through a special guide pipe, which can instantly send colored paper and fireworks to an altitude of 15 meters. This machine is suitable for various celebrations and large-scale performances.
